Supporting society and economics through technology

relationships

beliefs

capitalism

values

globalisation

governance and
regulation

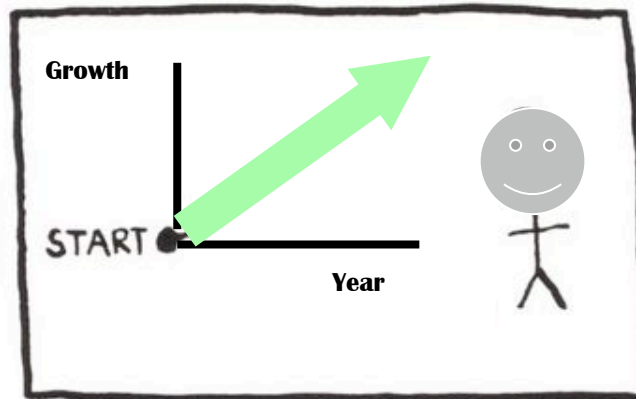

Future Internet

How can FISE influence FISO?

- Services supporting freedom, creativity and wealth creation
 - embracing uncertainty, realising opportunity whilst managing risks
 - transitioning from fortresses to evolutionary ecosystems
- Services that are closer to people and communities
 - empowering people to behave in accordance with their values
 - empowering communities to share values
- Services that help people understand their networks
 - billions on services, millions of people, lots of choice, help!
- Services that can help when things go wrong
 - helping government intervene when the balance of power shifts too far?

Outlook?
