

# Towards a Future Internet of Services

ICT Conference  
Lyon, November 25, 2008

Werner Mohr  
Nokia Siemens Networks  
Munich, Germany

# Future Internet – Overview

Future Internet

# Mutual dependence of Foundation and Pillars

- All elements of the Future Internet
  - Foundation and
  - Pillarsneed each other and are mutually dependent
- New services and applications are prerequisite for investments in new infrastructure
  - 👉 Technology pull
- Infrastructure without necessary capabilities can not support new services and applications
- New infrastructure technologies open new opportunities for new services and applications
  - 👉 Technology push
- Therefore, cooperation between all stakeholders required for successful Future Internet

# Circle of dependencies
